Sir:

**RESPONSE**

Responsive to the Official Action dated December 20, 2000, the applicants elect, with traverse, as a non-crosslinked copolymer the (meth)acrylic acid / ethyl acrylate/polyoxyethylenated stearyl methacrylate copolymers and, as a surface active agent, the (C8-C22) alkyl polyglucosides. In the event the Examiner requires an election of an insoluble conditioning agent, the applicants elect, with traverse, silicones.

The undersigned notes the Examiner required election of one of component (a), one of component (b), and one of component (c) of claim 1 during a teleconference on or about August 15, 2000. The applicants assume the Examiner no longer requires an election of a specific insoluble conditioning agent, as no requirement for the same was made in the Office Action of December 20, 2000. It is also assumed the Examiner has required an election of one of each of the components (a) and (b) of claim 1, as opposed to an election of either "species", as suggested at page 2 of the Office Action

of December 20, 2000. The Examiner is requested to advise the undersigned however if anything further is required in this regard. The applicants submit that this is a *bona fide* attempt to be fully responsive to the Office Action and extensions of time to further reply are requested in the event the species election requirement has been misunderstood.

In any event, the applicants respectfully submit the species requirement should not be required as examination of all of the claimed subject matter would not be an undue burden on the Examiner. As noted by the Examiner, the applicants will be entitled to consideration of claims to additional species upon the allowance of a generic claim.

Claims 1 to 14 read on the elected species.

An early and favorable Action on the merits is requested.

Respectfully submitted,

**NIXON & VANDERHYE P.C.**
